Client Testimonial for Bob Vander-Wal, Business Development Consultant

F3 Design & Architecture started working with Bob Vander Wal in July 2009, after being introduced by my accountant. We had been approached by another business coach, but felt their "one-size-fits-all" approach would not suit our type of business.

Bob offered our business his considerable experience in business development gained over many years in a variety of businesses in different areas across Australia. His manner was one of co-operation and working together, rather than dictating what the textbooks said should work.

He helped us focus on our core business and marketing, develop a simple mission statement and rationalize our business and personal goals. His monthly meetings are always full of sound ideas and suggestions to keep our business moving forward.

Max and I would recommend Bob's services to any business which needs help with focus and forward planning.

Regards

Michael Lake and Max Dunn,

Directors, F3 Design and Architecture
